Memorandum

SUBJECT: CB/NT PRP Search - Status of 104(e) Responses
FROM: Mike Stoner, Site Manager
TO: Jucinda Jacobs, PTI

EPA Region 10 Superfund	
RELEASABLE	
Date _____	Initial _____

On April 24, 1989, EPA issued general notice letters to 133 PRPs for the CB/NT site, including requests for information under Section 104(e) of CERCLA. All letters were sent by certified mail to ensure delivery. However, some letters were not successfully delivered, some recipients never responded, some asked for extensions, and others responded in full. In order to track the status of PRP notification and response the following sequence of document handling was utilized:

1. EPA issued letters via certified mail.
2. Copies of each letter were given document numbers by TechLaw and filed in the CB/NT site file.
3. Any discussions about the letter or requests for extensions were documented by EPA, given document numbers by TechLaw and entered in the site file.
4. PRP responses were logged in by EPA, given a brief review for possible claims of confidential business information (CBI) and given to TechLaw to receive document numbers.
5. PRP responses classified as CBI were routed to the Office of Regional Council (ORC) and are now filed with other CBI documents in a safe controlled by the Superfund Branch.
6. Non-CBI PRP responses were routed to Tetra Tech for a more complete review for CBI claims and to develop an updated list of PRP names, affiliations and contacts. Any CBI documents were returned to EPA.
7. Non-CBI PRP responses were copied by Tetra Tech and copies were returned to EPA for routing to Administrative Record repositories.
8. Tetra Tech retained the original non-CBI responses for more detailed review to determine the completeness and accuracy of the responses relative to the information developed during Phase 1 of the PRP search. Tetra Tech was further directed to review the responses according to criteria outlined in my November 15, 1989 memo to you. Tetra Tech conducted brief telephone interviews with some PRPs to clarify some of their responses.
9. Do to end-of-contract time and resource constraints not all responses were adequately reviewed by Tetra Tech under the TES 4 contract.
10. At contract close-out Tetra Tech returned all original PRP responses, review summaries of selected PRP responses, phone logs with PRPs and various other PRP search-related material to EPA.

Under the new TES 12 contract PTI has received a number of documents related to the CB/NT PRP search, including the draft Phase 1 PRP search report, non-CBI PRP responses copied by Tetra Tech, reference material developed by Tetra Tech and some more recent material from EPA. Attached with this transmittal are several notes and lists generated by personnel from EPA, Tech Law and Tetra Tech that were involved in the process outlined above. The

USEPA SF

1378500

~~CONFIDENTIAL~~

attachments provide some indication of the status of PRP notification and response, but not in an organized or complete manner. Please review the attachments as well as the PRP-related material already in your possession and provide a clear outline of the status of each PRP. Current status may include various combinations of the following:

- ° letter never successfully delivered
- ° no response
- ° request for extension
- ° extension provided
- ° partial response
- ° full response
- ° telephone followup by Tetra Tech
- ° review and summary of response

Finally, some PRP responses which were received after late August 1989 are in EPA's possession, but have not gone through the routing procedure outlined above. These responses will be routed to PTI once they have been given document numbers and reviewed for CBI claims.

COMMENCEMENT BAY NEARSHORE/TIDEFLATS LIST OF POTENTIALLY RESPONSIBLE PARTIES (PRPs) AS OF APRIL 24, 1989

104e RESPONSES NOT YET RECEIVED

After comparing notes with Greg Raffety, at Tech Law, its been determined that twenty four (24) PRPs have not responded to the PRP notice letter. Out of these twenty four PRPs that did not respond, nine had not received notice letters. The following is a list of the PRPs which have not responded as of yet — noting whether each PRP has been granted an extension, and if a notice letter was delivered.

STATUS REPORT FOR COMMENCEMENT BAY
PRP SEARCH- 104(e) RESPONSE EVALUATIONS

CURRENT STATUS

A total of approximately 130 companies and individuals (PRPs) were sent 104(e) information request letters earlier this year. About 110 PRPs have responded to date, and Tetra Tech has received approximately 100 of the responses for evaluation. Of these 100, 37 have been reviewed and draft evaluations written. 10-12 of the draft evaluations have been through in-house technical and editorial review and will be submitted to U.S. EPA by 10 August 1989; the remaining 25 are in varying stages of review and will be submitted as they are completed.

The issue of revisions to Draft Evaluations should be addressed as soon as possible. Tetra Tech recommends that the following approach be used to expedite the review/revision process. First, all deliverables will be sent in both hard copy form and on floppy disk (soft copy). Revisions can be made as follows:

- If there are major technical problems with the Draft Evaluations, Tetra Tech will take U.S. EPA's comments and rework the evaluation and provide a revised deliverable.
- If only minor technical or editorial (e.g., word selection) changes are deemed necessary, changes can be made by U.S. EPA personnel on the soft copy with any outstanding technical questions resolved over the phone.

There should be few if any evaluations requiring major revisions. Therefore, adherence to the approach outlined above will greatly reduce the time required to make revisions (e.g., no waiting for mail) and allow Tetra Tech

personnel to focus on completing evaluations for all the remaining PRPs.

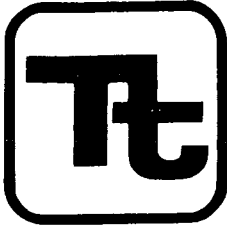

TENTATIVE SCHEDULE

For numerous reasons, the original schedule for delivering evaluations for one waterway a week has not been met. Tetra Tech has reviewed the responses by waterway in the order agreed to earlier (St. Paul and Ruston, Sitcum, Middle, City, Wheeler-Osgood, and Hylebos). St. Paul Waterway and Ruston have been completed. The majority of responses for Sitcum, Middle, and Wheeler-Osgood Waterways have been reviewed and approximately a quarter of City Waterway has been reviewed. The following schedule for the remaining deliverables represents Tetra Tech's best estimate on when the evaluations can actually be completed.

<u>Waterway</u>	<u>Proposed Due Date*</u>
Sitcum	25 August 1989
Middle, Wheeler-Osgood	1 September 1989
City	15 September 1989
Hylebos	30 September 1989

*- Includes only those responses Tetra Tech has received one week before proposed due date.

Commencement Bay PRP Search
File Close Out and Final Deliverables

Dear Mike:

The items listed below are being delivered for your use at the end of the TES IV contract.

- Original PRP 104(e) responses (5 boxes). This includes all responses delivered to Tetra Tech through the end of July 1989. All these materials have been copied, with the exception of some large figures.
- Original PRP 104 (e) responses (1 box) that have not been copied. This includes responses, or portions of responses from Modern Properties, WA Dept. of Natural Resources, the Port of Tacoma, Stephen Anderson, Marine Iron Works (MSDS information only), Globe Machine Works (supplemental information only), Union Oil (figures only), Tacoma Public Utilities, and Tacoma Public Works (figures only).
- Miscellaneous maps and photographs.
- Documents and notes from TPCPD and Ecology files that were not used in the Draft PRP Search Report or PRP evaluations. This includes information on some parties outside the study area.
- Reference information used in evaluating PRP responses, and in the preparation of the Draft PRP Report. This includes

some duplicate copies, and includes information obtained from TPCHD and Ecology files, corporate reports, address lists, and some telephone contact reports.

Tetra Tech has completed evaluations of the PRP 104 (e) responses listed below. You will receive all of these evaluations in a single package on Monday October 2nd.

- Hylebos: Bonneville Power Administration, Buffelen Woodworking, Chemical Processors, General Metals, Louisiana Pacific, Murray Pacific, Occidental Chemical, Port of Tacoma/Wasser-Winters, and WDNR.
- Sitcum: One Newco, Apex Forge and Tool, Sound Battery, General Chemical, Glein Investments, Hertz Rentals, Nulife, McKenzie Fuels (and Eva McKenzie), Norcore Plastics, OR & WA Railroad, Pabco Roofing, Pacific Marine Repair, Suburban Propane, and the William Drury Company.
- St. Paul: Champion International and Simpson Tacoma Kraft.
- Middle: Marine Industries NW, Paxport Mills, Puget Sound Plywood, Union Pacific Railroad, Washington Belt and Drive, Western Machine Works, and WDNR.
- Wheeler-Osgood: Burlington Northern, Premier Industries, and Rainier Plywood.
- City: Brandrud Furniture, Olympic Chemical, OR & WA Railroad, Parker Paint, Pickering Industries, Superior Oil, WDNR, and Woodworth and Company.

Tetra Tech has also completed a draft users manual for the PRP database. This manual, and floppy discs with the data, will be delivered to you on Monday, October 2nd.

I have enjoyed the opportunity to work with you on this project. Despite the delays encountered, I hope Tetra Tech has performed to your satisfaction. Please let me know if we can be of service to you on this, or other projects, in the future.

Sincerely,

Greg Bawden
Environmental Scientist
Hazardous Materials Management
